About Us

Anion International Ltd. is a building and engineering contractor. Specializing in the construction of major, complex projects, a dynamic European company able to complete with a leading European experience.

Founded in 1992 by a group of young mechanical engineers. The firm was registered in the court of Thessaloniki with Reg. nr. 999587704. Anion embarked on designing, installing and maintaining various mechanical systems in the fields of industrial and commercial building.

After 10 years of growth and successes in Greece, the company expanded its activities in Cyprus 2004, Albania 2007, Republic of Macedonia 2014.

In 2012 the company expanded its activities in the Middle East starting in Saudi Arabia with operation's centre in Riyadh and following by State of Qatar in 2016. Operating in Europe and Middle East with a young and energetic team, Anion International is new dynamic construction company focusing on sectors of commercial and industrial building.

The management and the entire group are committed to operate in accordance with environmental, ethical and professional principles, which comply with the highest international criteria for corporate governance and citizenship.

Anion's significant experience and successful completion of numerous projects to design, install and maintain are the greatest assurances to our partners and the main assets of this company.
